Wealthy Women Website - Deployment Guide

📁 File Structure

```
wealthy-women-website/
├── index.html
├── styles.css
├── script.js
├── assets/
│   └── logo.png
├── README.md
└── .gitignore
```

🚀 Quick Setup Instructions

Step 1: Create Your Project Folder

```bash
bash

mkdir wealthy-women-website
cd wealthy-women-website
```

Step 2: Download the Logo

- Save the logo from: https://i.ibb.co/ZMkYLKb/Screenshot-2024-12-22-at-1-18-07-AM.png
- Create an `assets` folder and save as `logo.png`

Step 3: Get All Files

I'll provide you with separate artifacts for:

1. `index.html` - The main HTML structure
2. `styles.css` - All styling (currently embedded, needs extraction)
3. `script.js` - All JavaScript functionality
4. `.gitignore` - Git configuration

Step 4: Initialize Git Repository

```
bash
```

```
git init
git add .
git commit -m "Initial commit: Wealthy Women website"
```

Step 5: Create GitHub Repository

1. Go to https://github.com/new

2. Name it `wealthy-women-website`

3. Don't initialize with README (you already have files)

4. Click "Create repository"

Step 6: Connect and Push to GitHub

```bash
bash

git remote add origin https://github.com/YOUR-USERNAME/wealthy-women-website.git
git branch -M main
git push -u origin main
```

🌐 Deployment Options

Option A: Vercel (Recommended - Easiest)

1. Go to https://vercel.com

2. Sign up/Login with your GitHub account

3. Click "New Project"

4. Import your `wealthy-women-website` repository

5. Click "Deploy"

6. Done! Your site will be live at `https://your-project-name.vercel.app`

Custom Domain Setup:

- Go to Project Settings → Domains

- Add your custom domain

- Follow DNS configuration instructions

Option B: Netlify

1. Go to https://netlify.com

2. Sign up/Login

3. Drag and drop your project folder OR connect GitHub repo

4. Deploy settings:

   - Build command: (leave empty)

   - Publish directory: (leave empty or use `/`)

5. Click "Deploy"

Custom Domain Setup:

- Go to Domain Settings

- Add custom domain

- Configure DNS records

Option C: GitHub Pages

1. In your GitHub repository, go to Settings → Pages

2. Under "Source", select `main` branch

3. Select `/ (root)` folder

4. Click Save

5. Your site will be live at `https://YOUR-USERNAME.github.io/wealthy-women-website/`

Note: GitHub Pages may have some limitations with custom fonts from external sources.

📋 Files You Need

.gitignore

```
# Dependencies
node_modules/

# System Files
.DS_Store
Thumbs.db

# Editor directories
```

```
.vscode/
.idea/

# Logs
*.log
```

README.md (for your repository)

```markdown
# Wealthy Women - Closing the Gender Gap in Capital

A research-backed initiative bringing together women in Venture, Private Equity & Debt, Angels & Philanthropy to accelerate

## 🎯 Goal
Increase VC funding to female founders from 2.2% to 10% by 2030.

## 🚀 Features
- Research findings from Parsons ELab and Diversified Capital Coalition
- AI-powered dealmaking platform
- Capital allocator accountability metrics
- Multi-stakeholder approach to systemic change

## 🛠️ Built With
- HTML5
- CSS3 (Custom styling with gradients and animations)
- Vanilla JavaScript
- Google Fonts (Playfair Display, DM Sans, Cormorant Garamond)

## 📱 Responsive Design
Fully responsive across desktop, tablet, and mobile devices.

## 📄 License
© 2025 Wealthy Women. All rights reserved.
```

🔧 Testing Locally

Before deploying, test locally:

1. **Simple way:** Just open `index.html` in your browser

2. **Better way (with live server):**

```bash
# Install live-server globally
npm install -g live-server

# Run from project directory
live-server
```

✅ Pre-Deployment Checklist

☐ Logo image is in `assets/logo.png`

☐ All links work correctly

☐ Forms/buttons link to correct URLs

☐ Test on mobile device or browser dev tools

☐ Check all sections load properly

☐ Verify smooth scrolling works

☐ Test tab interactions in Stakeholder section

☐ Confirm all external links open correctly

🎨 Customization Tips

Change Colors

All colors are defined in CSS variables at the top of `styles.css`:

```css
:root {
    --coral: #D946EF;
    --coral-dark: #A855F7;
    --teal: #8B5CF6;
    /* etc... */
}
```

Update Content

- Edit text directly in `index.html`

- Images: Place in `/assets` folder and update paths

- Links: Update href attributes in HTML

🐛 Troubleshooting

Fonts not loading?

- Check internet connection (fonts load from Google)

- Or download fonts and host locally

Images not showing?

- Verify file paths are correct

- Check image files exist in `/assets` folder

- Use browser DevTools to check console for errors

Smooth scroll not working?

- Make sure `script.js` is properly linked

- Check browser console for JavaScript errors

📞 Support

For issues or questions:

- Email: Jody@womenfundingtheworld.com
